

Combine two zones to cook more

The 6000 Bridge Induction Hob can easily cope when you're cooking with bigger pans. The Bridge button links two cooking zones together to fit any large or long pan. The bridged zone will share the same temperature and time setting.

Product Benefits & Features

Combine 2 cooking zones with Bridge

The Bridge function combines two cooking zones together to fit any large or long pan. Sharing the same temperature and time setting, the linked zones are ideal when you're cooking for dinner parties or bigger celebrations.

Hob2Hood®: The hands-free hood

The Hob2Hood® function connects the hob and the hood. The cooker hood automatically adjusts the fan speed based on the heat, without lifting a finger. For powerful extraction when searing. And quieter extraction when simmering.

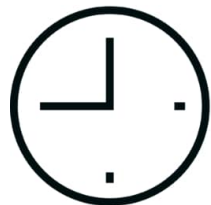

Less steps and more control with Direct Touch Controls

The Direct Touch Controls user interface uses intuitive numbers 1-14 so you can set the right temperature right away without having to toggle through the plus and minus buttons.

Quicker heat for extra speed with PowerBoost

A blast of fast. No more waiting around for pots to boil. The PowerBoost function gives you an instant burst of heat. PowerBoost is perfect for tasks that require you to boil a large pot of water quickly.

Hob timer. Built for precision

The built in hob timer can be set up to one hour, and will automatically power the hob down when it elapses. For effortlessly precise results.

- Cooking function: induction
- Direct-Control cooking zone control
- Power function for each cooking zone
- Automatic pan recognition
- Auto heat up function
- Digital indications for each zone
- OptiHeat Control
- Child lock function
- OffSound Control
- Count up timer
