

Architekt Centre Press Top Basin Waste

Slotted basin waste for basins with an overflow hole

A practical and stylish alternative to a traditional basin plug, this Architekt waste features a simple centre press top operation and a polished chrome finish. Designed for basins with an overflow, the slotted body allows overflow water to drain correctly while the push-top design helps prevent small objects from being lost down the waste hole.

Key features

- **Simple press top operation** - press the centre of the waste to open or close it.
- **For basins with an overflow** - the slotted design allows waste water from the basin overflow to flow through the waste.
- **Polished chrome finish** - easy to clean and designed to coordinate with other chrome bathroom fittings and accessories.
- **Practical push-top design** - provides a neat alternative where a traditional plug is not suitable.
- **Plastic internal mechanism** - includes a high-quality plastic internal mechanism.
- **Standard connection** - G1 1/4 inch basin connection.

Technical specifications

Specification	Details

Waste type	Slotted
Suitable for	Basins with an overflow hole
Operation	Press top
Colour / finish	Polished chrome
Connection size	G1 1/4 inches
Internal mechanism	Plastic
Warranty	1 year

Good to know

This is a **slotted** basin waste and should be used with a basin that has an **overflow hole**. The slot allows water entering the basin overflow to pass into the waste and drain away.

Product information is based on specifications published on [Plumbworld.co.uk](https://www.plumbworld.co.uk). Please check suitability for your basin before installation.
