

Architekt Flat Mushroom Clicker Basin Waste

Unslotted basin waste for basins without an overflow hole

A practical and stylish alternative to a traditional plug, this Architekt flat mushroom basin waste features simple clicker operation and a polished chrome finish. Designed for basins without an overflow, it is made from high-quality zinc alloy for a robust finish suited to regular bathroom use.

Key features

- **Simple clicker operation** - press the top to open or close the waste.
- **For basins without an overflow** - the unslotted design is intended for basins that do not have an overflow hole.
- **Flat mushroom design** - gives the basin a neat, contemporary finishing touch.
- **Chrome-plated zinc alloy** - robust construction with a polished finish that coordinates easily with chrome taps.
- **Easy to clean** - the flat mushroom-shaped top cap can be unscrewed by twisting it anti-clockwise.
- **Standard connection** - G1 1/4 inch basin connection.

Good to know

This is an **unslotted** basin waste and should be used with a basin that does **not** have an overflow hole. If your basin has an overflow, a slotted waste is required instead.

Product information is based on specifications published on [Plumbworld.co.uk](https://www.plumbworld.co.uk). Please check suitability for your basin before installation.
