Important Safety Information

• Please read these instructions thoroughly and retain for future use.

- All products manufactured and supplied by Bristan are safe provided they are installed, used correctly and receive regular maintenance in accordance with these instructions.
- If you are in any doubt about your ability to install this product safely you must employ the services of an experienced qualified plumber/electrician.

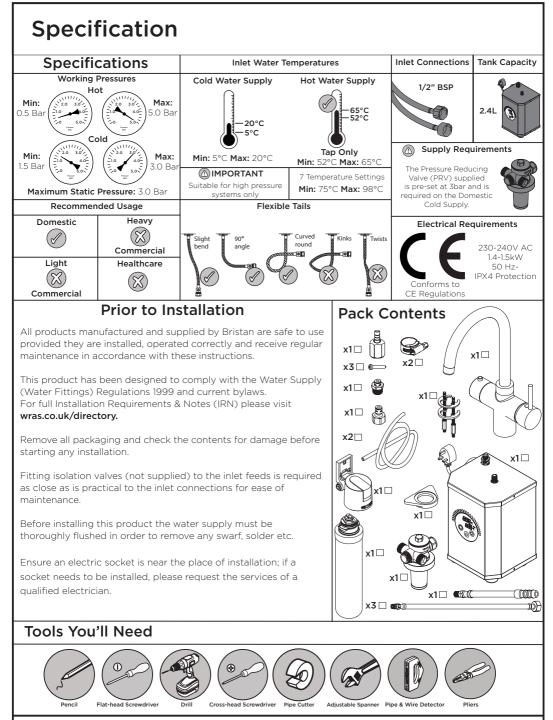

Warning: The Boiling Water Tank is intended for domestic use only. Do not install the unit outdoors or where it might be subjected to damp or freezing conditions.

- Check the power rating of the Boiling Water Tank is suitable for the power rating of the electrical circuit that it is being installed on
- Check that no parts are missing or damaged on the Boiling Water Tank or Tap as per the instructions. If parts are missing or damaged, do not install and contact Customer Services
- Ensure the Boiling Water Tank is installed in a room/environment with an access point. This is required to prevent condensation forming within the unit. Keep away from direct sunlight.
- This Boiling Water Tank is only intended for use with compatible Bristan Boiling Water Taps. Using this tank with any other tap will invalidate the guarantee.
- Do not attempt to open or modify the Boiling Water Tank as this will invalidate the guarantee.

Important Safety Information

- The filter supplied has to be replaced every six months for protection of your Boiling Water Tank. Failure to do so will invalidate your guarantee.
- To protect against electric shock, do not place the cord, plugs or Boiling Water Tank near or in water/ other liquids. Do not operate the appliance or touch the plug with wet hands.
- Only use the power lead supplied with the product. If the power lead is damaged, stop using immediately and contact Customer Services for a replacement. Do not attempt to fix as this can result in serious injury or death.
- Do not remove the earthing terminal, reconstruct the plug, or disassemble the main box or any part for the power.
- The appliance must be installed vertically with the inlet and outlet connections at the top of the unit. Ensure that front of the unit is visible and the touch-screen can be easily reached.
- Warning: This appliance is not intended for use by children or persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge; unless they have been given supervision or instruction concerning use of appliance in a safe way, and understand the hazards involved.
- Children should not play with the appliance. Cleaning and maintenance should not be undertaken by children without supervision.
- Turn off all controls before unplugging. Unplug by grasping the plug, not the cable.

Installation Requirements

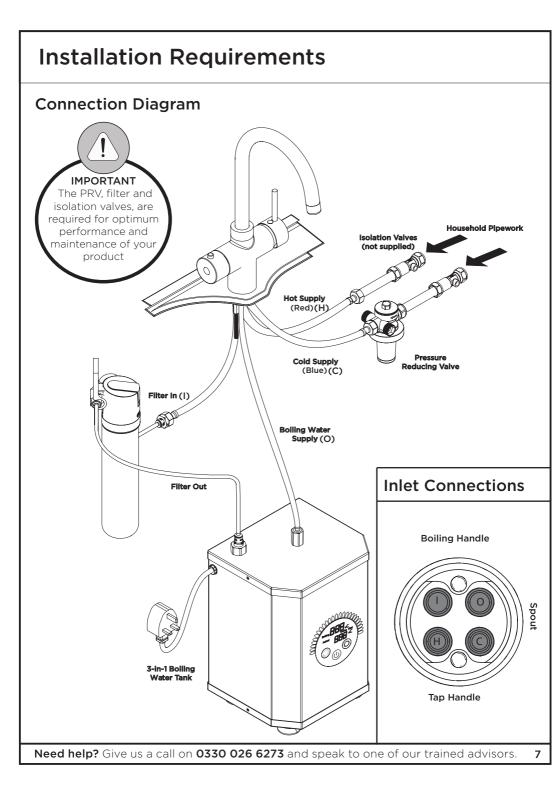

Positioning the Boiling Water Tank

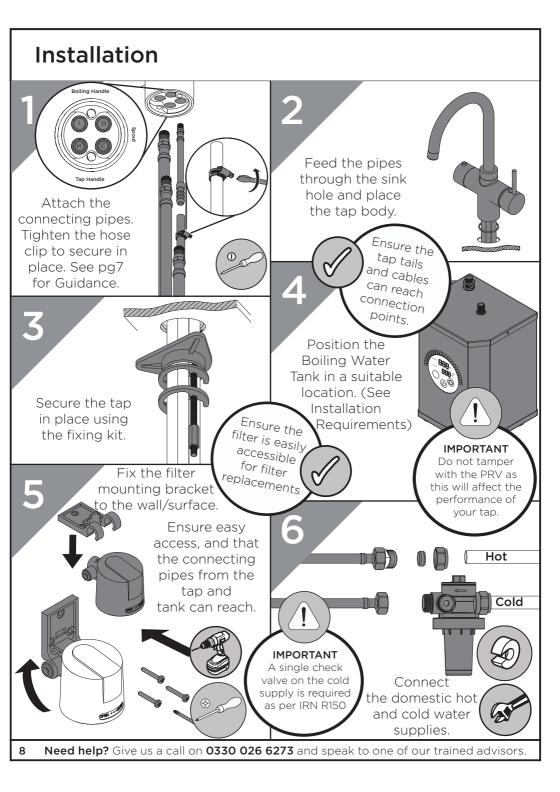

Place the tank in a suitable, well ventilated location that will not fall below 0°C. Ensure that the tank is installed vertically on a level surface with adequate space around the tank. Keep away from direct sunlight.

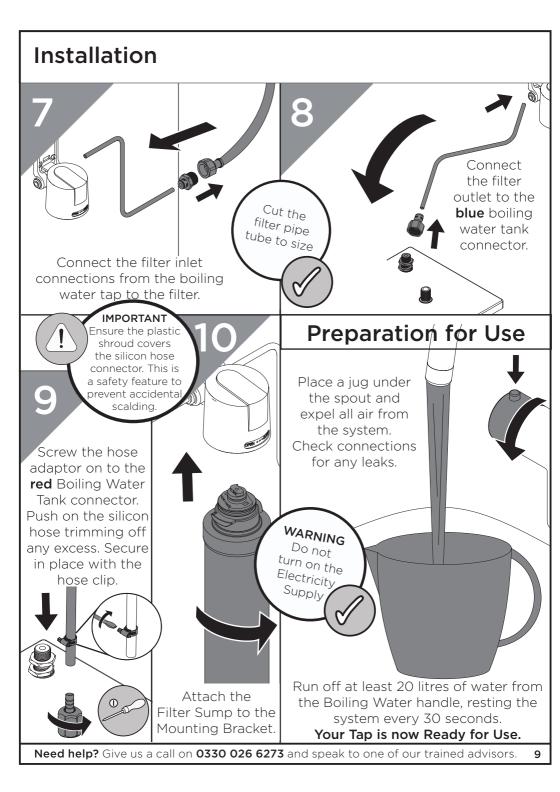

We recommend installing a Drain Pan and waste (not supplied) to protect against water damage and for ease of emptying the tank. Also ensure that the Filter is in an easily accessible place for replacement purposes.

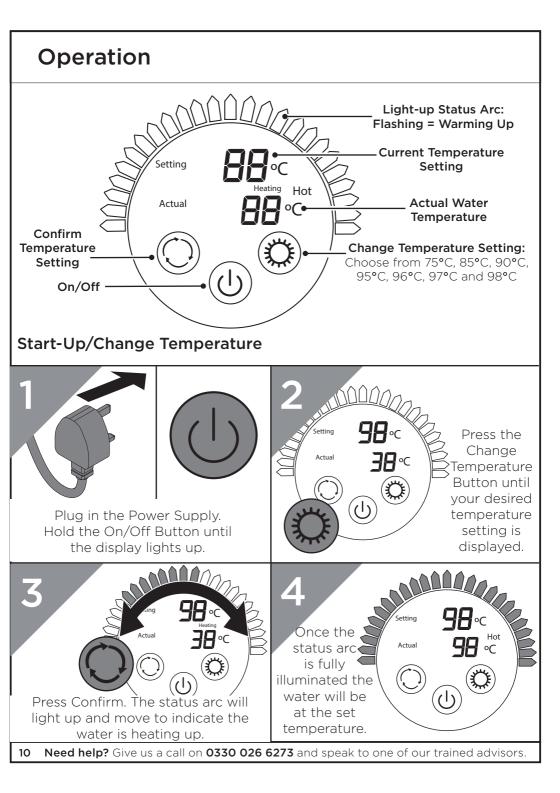

Ensure that the tap tails and filter connections can reach the connection points.

Troubleshooting

l

Symptom	Cause	Remedy
'99' flashing in the 'Set Temperature' display.	Boiling Water Tank is empty at first switch-on.	Follow the Preparation for Use section
	Boiling Water Tank isn't holding water.	Check connections for any leaks. Contact Customer Services.
Water/Steam is spitting from the spout.	Unit is boiling.	Turn the Instant Hot Water Tap handle and release the water.
		Adjust the water temperature to a lower setting - See Operation.
		Check the aerator isn't blocked.
		Follow the Preparation for Use sectio to remove any airlocks.
Water is not hot.	The Boiling Water Tank is unplugged.	Make sure the appliance is plugged in and the display is lit.
		Make sure the circuit breaker and fus are working correctly.
	The Boiling Water Tank is not switched on.	Follow the Start-Up steps (pg10) and wait until the Status Arc is fully lit before use.
	Water hasn't finished heating up.	
Water is too hot.	The water temperature is set too high.	Set the water temperature to a lower setting - See Operation.
Water is dripping from the spout.	Residual water tension.	This is caused the build up of water i the tap body and is normal for a sho period of time.
	The Expansion Chamber isn't draining correctly.	Draw off 500ml of water to clear and prime the system. Avoid drawing off less than 150ml per use.
	Blocked spout.	See Maintenance Section to Clean Aerator.
Slow flow from the spout.	Water Filter needs changing.	Refer to the Maintenance Steps to change the water filter. This must be changed every 6 months or it will invalidate the guarantee.
Water doesn't flow straight away.	This appliance is designed for non-pressurised operation. There will be a slight delay until the instant hot water appears.	After a large volume of water has been drawn off, there may be a slightly longer delay in water appearing from the Instant Hot Water spout.
No water flowing.	Closed/Partially closed isolation valves.	Make sure isolation valves are fully open.
	Flexible tails kinked/blocked.	Ensure pipes are not twisted or kinke to restrict flow.
	Boiling Water Tank may be blocked.	Contact Customer Services.
