Key Features

- Soft-close mechanism helps prevent the seat and lid from slamming
- D-shaped profile for compatible modern toilet pans
- Top-fix hinges allow installation from above
- Lightweight plastic construction
- Fixed 175mm fixing centres
- Two-year guarantee

Installation Notes

Check the toilet pan shape, overall seat dimensions and the centre-to-centre distance between the pan's fixing holes before fitting. This model has fixed 175mm hole centres rather than an adjustable fixing range.

Source check: I searched first for an original Ceramica manufacturer datasheet or product-specific PDF but did not find one. Plumbworld's product listing and technical drawing provide the available specifications for this model. Because I could not verify a genuine Ceramica logo asset from an official manufacturer source, I have used a simple brand-name heading rather than inventing or approximating a logo.
