

Angled Anthracite Thermostatic Radiator Valve & Lockshield - 15mm

A modern angled thermostatic radiator valve and matching lockshield set designed for 15mm heating pipework. The thermostatic head regulates water flow in response to room temperature, while the lockshield allows the radiator to be balanced as part of the heating system.

Product Specifications

Specification	Details
Brand	DuraTherm
Product type	Thermostatic radiator valve & lockshield
Connection type	Angled
Control type	Thermostatic
Connection size	15 mm
Colour / finish	Anthracite / grey
Style	Modern / contemporary
Thermostatic element	Liquid
Bi-directional	No
Lockshield included	Yes
Guarantee	10 years

Key Features

- Angled valve configuration
- Thermostatic temperature control
- Liquid-filled thermostatic element
- Matching lockshield valve included
- 15mm connection size
- Contemporary anthracite finish
- 10-year guarantee

Installation Notes

Angled radiator valves are typically used where heating pipework approaches the radiator at a right angle. This valve is not bi-directional, so the required flow direction should be observed during installation. The lockshield should be adjusted when balancing the heating system.
