

Angled Black Thermostatic Radiator Valve & Lockshield - 15mm

A modern angled thermostatic radiator valve and matching lockshield set for 15mm heating pipework. The thermostatic head regulates radiator flow in response to room temperature, while the matching lockshield allows the heating system to be balanced.

Product Specifications

Specification	Details
Brand	DuraTherm
Product type	Thermostatic radiator valve & lockshield
Connection type	Angled
Control type	Thermostatic
Connection size	15 mm
Colour / finish	Black
Style	Modern
Thermostatic element	Liquid
Bi-directional	No
Lockshield included	Yes
Guarantee	10 years

Key Features

- Angled valve configuration
- Thermostatic temperature control
- Liquid-filled thermostatic element
- Matching lockshield valve included
- 15mm connection size
- Modern black finish
- 10-year guarantee

Installation Notes

Angled radiator valves are suited to installations where the pipework meets the radiator at a right angle. This valve is not bi-directional, so observe the required flow direction during installation. Adjust the lockshield as required when balancing the heating system.
