

Angled Chrome Thermostatic Radiator Valve & Lockshield - 15mm

An angled thermostatic radiator valve and matching lockshield set for 15mm heating pipework. The liquid-filled thermostatic element regulates radiator flow in response to room temperature, while the lockshield allows the radiator to be balanced within the heating system.

Product Specifications

Specification	Details
Brand	DuraTherm
Product type	Thermostatic radiator valve & lockshield
Connection type	Angled
Control type	Thermostatic
Connection size	15 mm
Colour / finish	Chrome
Style	Modern
Thermostatic element	Liquid
Bi-directional	No
Lockshield included	Yes
MPN	PWTRV116LS
Guarantee	10 years

Key Features

- Angled 90-degree valve configuration
- Thermostatic temperature control
- Liquid-filled thermostatic element
- Matching lockshield included
- 15mm connection size
- Chrome finish
- 10-year guarantee

Installation Notes

Angled radiator valves are suitable where central-heating pipework approaches the radiator at approximately 90 degrees, commonly from the wall. This valve is not bi-directional, so observe the required flow direction during installation. Adjust the lockshield when balancing the heating system.
