

Straight Anthracite Thermostatic Radiator Valve & Lockshield - 15mm

A straight thermostatic radiator valve and matching lockshield set for 15mm heating pipework. The thermostatic head regulates radiator flow in response to room temperature, while the lockshield is used to balance the radiator within the heating system.

Product Specifications

Specification	Details
Brand	DuraTherm
Product type	Thermostatic radiator valve & lockshield
Connection type	Straight
Control type	Thermostatic
Connection size	15 mm
Colour / finish	Anthracite / grey
Style	Modern / contemporary
Thermostatic element	Liquid

Guarantee	10 years

Key Features

- Straight valve configuration
- Thermostatic temperature control
- Liquid-filled thermostatic element
- Matching lockshield included
- 15mm connection size
- Contemporary anthracite finish
- 10-year guarantee

Installation Notes

Straight radiator valves are intended for installations where the pipework and radiator connection align in a straight line, commonly with pipework rising from the floor. This valve is not bi-directional, so observe the required flow direction during installation. Adjust the lockshield when balancing the heating system.
