BREAKING THE MOULD

Forever White provides a solution to what has been a problem to households, nationwide for years

containing
SteriTouch
ANTIBACTERIAL PROTECTION

BREAKING THE MOULD

Thanks to the Forever White range of products containing SteriTouch® Antibacterial Protection, mouldy sealant in the bathroom, shower room and kitchen is now a thing of the past.

The Forever White range of superior silicone sealants offer a full ten years protection against mould and discolouration.

By their very nature, silicone sealants are often used in areas that need protection from the ingress of water, extensive exposure to condensation and high humidity, the very conditions in which mould, mildew and bacteria thrive. Without an antibacterial additive, sealant can rapidly degrade and discolour, turning black and unsightly with no remedial treatment available.

The Forever White range from Everbuild contains SteriTouch®, which is an antimicrobial additive designed to reduce the growth of harmful organisms such as bacteria, mould and fungi, whilst remaining safe for even the most sensitive applications.

Forever White containing SteriTouch® is independently tested in accredited antimicrobial laboratories to show no mould growth after 10 years simulated ageing (copies of test data available upon request) Forever White also kills germs including E-coli, MRSA and Salmonella.

BLACK MOULD
A common problem
in areas of high
humidity

Also available in clear and ivory colour
Plus a handy squeezy tube and accessories
See over for details

ANTIBACTERIAL PROTECTION

SteriTouch® is an antibacterial additive designed to reduce the growth of harmful organisms such as bacteria, mould and fungi, whilst remaining safe for even the most sensitive applications.

AREAS OF USE

Forever White is permanently waterproof and flexible and is produced from a superior silicone formula and is ideal for:

- Sealing shower bases and cubicles
- Sealing around baths
- Sealing wet rooms
- Sealing around sinks and basins
- Sealing around sanitaryware
- Use in kitchens, utility rooms and all areas of high humidity
- Also ideal for sealing around windows, door frames and air vents internally, in areas subject to high condensation
