- Water dispenser available with stainless steel door panel accessory
- Spacious bottom freezer with full extension drawer and ice maker with boost function

DIMENSIONS

Height	1797 mm
Width	896 mm
Depth	610 mm

FEATURES & BENEFITS

Activesmart™ Foodcare

ActiveSmart™ Foodcare learns how you live. It's technology which understands how you use your refrigerator and adjusts temperature, airflow and humidity inside to help keep food fresher for longer.

Simple Storage

This refrigerator is designed to make it simple for you to store, access and remove food. Storage bins give you full access inside when they're pulled open and can be easily removed to clean. Our flexible shelving also gives you more storage options.

Ice Maker

Fresh ice is always available for you in a dedicated freezer bin. Simply turn it off to free up freezer space or during busy times, you can boost ice production by up to 30%.

Water On Tap

The slimline dispenser makes it easy to fill almost any sized jug or vessel with cool filtered water and doesn't take up any storage space in your refrigerator. You'll need to purchase our stainless steel door panel in order to use the water dispenser.

Easy Cleaning

No more permanent dirty marks with our EZKleen feature for stainless steel refrigerators. Anti-fingerprint coating means you simply wipe clean any marks. Spill-safe secure glass shelves easily capture any drips or leaks.

Clever Energy

Your refrigerator adapts to daily use by cooling and defrosting only when needed. This ActiveSmart™ technology means better energy efficiency without compromising on food care.

Ultra slim water dispenser	•	Unpackaged weight	138 kg		All appliances use energy, and energy usage typically generates carbon emissions. Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.
Freezer Features					

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
