

INS CZ 25145 - A

Top edge of glass to be level with the top edge of the Lantern frame.

Slot the glass into the frame and ensure it is firmly located behind the tab on the frame.

Once the tab locks are inserted into the frame and ready to twist in place, you may need to slightly lift the lid in order to aid the turning.

Lid and frame edges align once correctly fitted

Please take time to read this leaflet carefully and retain it for future reference.
