

Hive Active Smart Plug v3 - 851990

Smart plug with app control, energy monitoring and custom scheduling

Add smart control to everyday electrical appliances with the Hive Active Smart Plug v3. Plug it into a standard socket, connect a compatible appliance and use the Hive app to switch it on or off, monitor electricity use and create schedules that fit around your routine.

Key features

- **Control appliances from anywhere** - switch compatible electrical devices on or off through the Hive app, whether you're at home or away.
- **Energy monitoring** - track how much electricity connected appliances are using and identify devices that may be consuming more power.
- **Reduce unnecessary standby use** - switch appliances off at the socket from the app when they are not needed.
- **Custom schedules** - create up to six on/off schedules each day to automate compatible appliances.
- **Voice control compatible** - works with Alexa, Google Assistant, Apple HomeKit and Siri Shortcuts.
- **Built-in signal booster** - helps strengthen communication between your Hive Hub and other compatible Hive devices.
- **Compact design** - sized to fit neatly into most sockets without taking up unnecessary space.
- **Simple plug-and-play setup** - connects like a standard plug adaptor with no complicated installation required.
- **Low running cost** - designed to be highly energy efficient, costing around 40p per year to run on average.
- **1-year warranty** - for added reassurance.

Technical specifications

Specification	Details
Brand	Hive
Product type	Active smart plug
Version	v3
Product code	851990
Height	64 mm
Width	54 mm
Depth	36.7 mm
Depth including pins	59.4 mm
Daily schedules	Up to 6
App control	Hive app
Energy monitoring	Yes
Signal booster	Built in
Voice compatibility	Alexa, Google Assistant, Apple HomeKit & Siri Shortcuts
Warranty	1 year

What's included

- 1 x Hive Active Smart Plug v3
- User guide

Good to know

The smart plug can be used with compatible electrical appliances to provide remote on/off control, scheduling and energy monitoring through the Hive app. When connected, it can also help boost the signal between compatible Hive devices and the Hive Hub.

Product information is based on specifications published on [Plumbworld.co.uk](https://www.plumbworld.co.uk). Check appliance and Hive system compatibility before use.
