

Hive Thermostatic Radiator Valve (TRV) 15mm - 5 Pack

Smart radiator valves for room-by-room heating control

Take more control over how your home is heated with this five-pack of Hive Thermostatic Radiator Valves. Each smart TRV lets you manage the temperature of a compatible radiator individually, making it easier to create different heating schedules for different rooms and avoid heating spaces when they do not need it.

Key features

- **Room-by-room heating control** - set individual temperatures for compatible radiators rather than heating every room to the same level.
- **Smart scheduling** - create personalised heating schedules for different rooms to suit your routine.
- **Group multiple radiators** - control several compatible radiators together for quicker adjustments.
- **Works with the Hive app** - use the app for setup and day-to-day temperature control.
- **Child Lock function** - helps prevent accidental changes to your chosen temperature settings.
- **Ultra-quiet motor** - designed for discreet everyday operation, with anti-stick protection for reliable performance.
- **Works with or without a Hive Thermostat** - suitable for expanding an existing Hive system or adding smart radiator control separately.
- **15mm compatibility** - designed for compatible 15mm thermostatic radiator valve bodies.
- **Five valves included** - ideal for adding smart control to several rooms at once.
- **1-year warranty** - for added reassurance.

Technical specifications

Specification	Details
Brand	Hive
Product type	Smart thermostatic radiator valve
Product code	851961
Pack quantity	5
Control type	Thermostatic
Connection type	Straight
Connection size	15 mm
Lockshield included	No
Bi-directional	No
Style	Modern
Warranty	1 year

What's included

- 5 x Hive Thermostatic Radiator Valves
- AA batteries
- User guides

Compatibility & installation

These smart TRVs are designed to replace the heads on compatible existing thermostatic radiator valve bodies. Setup is completed using the Hive app. Check that your existing radiator valves and heating system are compatible before installation.

Good to know

Hive TRVs can be used with or without a Hive Thermostat. When several radiators are fitted with Hive TRVs, they can also be grouped together in the app for more convenient control.

Product information is based on specifications published on [Plumbworld.co.uk](https://www.plumbworld.co.uk). Please check heating-system and valve compatibility before installation.
