INSTALLATION GUIDE

Ideal Standard Jasper Morrison | Toilet seat and cover | E620301 | White | Standard close

Fixing: Top-fix hinge set

Feature: Quick-release seat and cover

Before you begin

Check that the supplied seat, cover, hinges, and fixings are complete and suitable for the WC pan. Protect the ceramic surface while working. A suitable screwdriver or other tool may be needed, depending on the supplied fixing set.

Fitting the seat and cover

1. Clean and dry the area around the two fixing holes at the rear of the toilet pan. Remove any old seat and fittings.
2. Position the supplied top-fix hinge assemblies over the fixing holes. Insert and engage the supplied fixing components in the order shown by the hardware supplied with the seat.
3. Leave the hinge assemblies loose enough to adjust their position. Align the hinge pins with the seat hinge sockets.
4. Lower the seat and cover onto the hinge pins until both sides are correctly engaged. Check that the seat is centred on the pan and that the front edge follows the pan outline.
5. Lift the seat as needed to access the fixings, then tighten both hinge assemblies evenly using the appropriate tool. Do not overtighten or force the fixings against the ceramic.
6. Re-engage the seat if removed, then raise and lower the seat and cover to confirm free movement and secure attachment. This is a standard-close seat: lower it by hand.

Quick-release removal and refitting

To clean around the hinges, raise the seat and cover and operate the quick-release catches on the hinge assembly, where fitted. Lift the seat straight off the hinge pins without forcing it. To refit, align both hinge sockets with their pins and press down until securely engaged. Check both sides before use.

Cleaning and routine checks

Clean the seat and cover with a soft cloth, warm water, and a mild cleaner. Avoid abrasive pads, harsh chemicals, and excessive water around the hinge fittings. Periodically check that the hinges remain secure and that the seat is correctly aligned.
