

It's time to throw in the towel

The evolution of body drying

Pamper your skin

Avoid falls in the bathroom

Your daily relaxing time

Saves water and electricity

Easy installation in the shower

Dry is in the air

Valiryo is a body dryer that aims to evolve the way we dry ourselves by providing safety, hygiene and comfort, through a current of air that is adjustable in intensity and temperature.

Say goodbye to the towels extending your relaxing moment in the shower while you soften and hydrate your skin.

Patented technology and “s” shaped design

Our technology, developed exclusively by VALIRYO's engineering team, is the only one that offers a homogeneous air flow, both in temperature and intensity, along the 27 diffusers of the column.

Frictionless anti-bacterial drying

Drying without a towel makes your skin softer and more moisturized. In addition, Valiryo has a silver ion treatment that produces an extra anti-germ effect.

Adjustable temperature and intensity

You can choose from 16 different combinations of air intensity and temperature (up to +32° C above the ambient temperature), allowing you to customize the experience.

Integrated motion sensor

Valiryo switches on automatically when we are in front of it at the last power and temperature chosen by the user. It switches off automatically once the drying time has elapsed.

No maintenance required

Valiryo does not require the periodic replacement of any of its parts and its maintenance consists simply of normal cleaning of its surface with a damp cloth.

Fully water resistant

Valiryo has an IP56 protection rating that makes it totally safe to install in the shower. It can also be installed outside by simply plugging it into the mains.

ECO-FRIENDLY
