Measurements in mm Combination with electric hob Standard, top-mounted installation

Standard: with worktop divider between downdraft and hob

Combination with gas hob is not possible

To prevent power loss, observe the following:

- Do not install upper cabinets or open shelf elements above the appliance
- Left/right distance between appliance and wall/adjacent upper cabinet min. 500 mm
- Distance between appliance frame and wall min. 50 mm

Planning recommendation, air recirculation

A: Exterior wall – U-value ≤ 0.5 W/(m²K)

Standard installation: Partially laid around the toe kick

B: Exterior wall – U-value > 0.5 W/(m²K)

Installation with fully laid pipework to the toe kick for poorly insulated exterior walls or above cold floors

Measurements in mm Combination with electric hob Seamless, top-mounted installation

A: Worktop overlap to kitchen cabinet
