

GENERAL FITTING GUIDE - RIGID RISER KITS

Important information

(Please leave this installation & user guide with the end user)

This installation guide is for rigid riser kits.

Prior to making the water connection to the inlet feed, please make sure that the supply pipe work has been flushed through to remove any debris.

Safety

We recommend that this product is fitted by a fully qualified installer. The installation must comply with all current water regulations. In order for this product to operate as designed it must be installed and commissioned as stated in this manual.

Aftercare

- When cleaning the product please do not use a substance that could possibly damage the surface finish. We recommend that soapy water with a mild detergent is used.
- Please take care not to damage the surface finish of the product. The finish is polished chrome and can be easily marked.

Installation

Select a suitable location and fixing point for rigid riser kit.

Depending on the model chosen, the rigid riser kit will be suitable for exposed or concealed installations.

Concealed installation:

Assemble the riser kit, making sure all washers & seals provided are used to create water tight joints.

Select a suitable location and fixing point for the rigid riser inlet elbow, using an appropriate plumbing connector (not supplied) for the water feed to the inlet elbow threaded connecting tube.

Securely fix the rigid riser kit to the wall.

Where a shower flex is part of the rigid riser kit, connect this to the outlet provided with the rigid riser kit. After securing everything in place, check for any leaks.

Exposed installation:

Assemble the riser kit, making sure all washers & seals provided are used to create water tight joints.

Select a suitable location and fixing point for the rigid riser kit.

Securely fix the rigid riser kit to the wall.

Connect the rigid riser kit to the outlet on the control valve.

Where a shower flex is part of the rigid riser kit, connect this to the outlet provided with the rigid riser kit. After securing everything in place, check for any leaks.
