The Purusline Living Linear Wetroom Solution makes your bathroom design possibilities come alive

Wetrooms are the fastest growth area in the UK sanitary and bathroom sector.

Wetrooms already account for 10% market share in the UK Bathroom sector. This figure is rising rapidly with wetrooms being very much in demand by the younger and older generations as well as the disabled.

The Purusline Living Linear Wetroom Solution allows quick and easy showering, with level access and low maintenance, creating an easy to install wetroom that is fashionable, functional and spacious.

Living Linear Wetroom

Make your bathroom design possibilities come alive! The Purusline Living Linear Wetroom Solution is our flexible wetroom solution - choose from 2 lengths and 3 outlet types. The Purusline Living Linear Wetroom Solution is BBA-Certified and all outlets come complete with the NOOD no-odour trap.

The Purusline Living Linear Wetroom Channel is available in lengths of 600mm and 800mm, with outlets available in Side, Side Side/Inline and Low - perfect for where there is limited space in the floor. All outlets are self-cleaning and the channels have built-in falls to ensure there is no dirt or odour build up. The Purusline Living Linear Wetroom Solution opens up completely new opportunities for exciting designs in the bathroom.

Outlet gullies

Side outlet

Flow rate: min. 60 litres/minute
Total channel height: 137-141mm

Low outlet

Flow rate: min. 30 litres/minute
Total channel height: 93-97mm

Side side/inline outlet

Flow rate: min. 60 litres/minute
Total channel height: 140-144mm

NOOD no-odour trap

The unique NOOD no-odour combined water and mechanical trap, which prevents any foul air escaping through the waste, is built into all Linear Wetroom gullies. A built-in spring mechanism ensures that the water trap always remains sealed, even if the trap is empty.

Tile Insert grate

The tile insert grate allows you to use the same tile in the grating as in the rest of the room, for a sleek, minimalistic look and a continuous tile design across the floor. Tiles up to 10mm are installed within the grate for a flush finish, ensuring that maintaining your stylish wetroom has never been simpler.

The complete Flexible Wetroom Solution

Purus Kits sold by Plumbworld contain the channel, tray, grate and tanking kit.

Centre Linear Former Trays - for Joist Installations

When installing into joist floors, the Centre Linear Former Tray, designed for use with the Purusline Living Linear Wetroom Channel and the Puragum Tanking Kit, is the perfect solution for simple installation. The Tray is installed on top of your floorboards and has falls built in for the shower water to flow into the gully. It comes in two sizes to complement the Purusline Living Linear Channel: 1400x920mm for the 600mm Channel; and 1600x920mm for the 800mm Channel. The Tray can be cut to size and scribed to the wall if desired.

The thickness of the Tray is 18mm and can be used in conjunction with 18mm Marine Ply on floorboards. It comes in one piece for ease of installation with packers for 22mm floors.

The wall and floor joints are taped and sealed with the Puragum Tanking Kit giving your wetroom a threefold waterproofing process.

1400x920x18mm Tray
for the 600mm Channel

1600x920x18mm Tray
for the 800mm Channel

Puragum Tanking Kit

Each Puragum Tanking Kit covers 8m² and is designed to waterproof plasterboard, concrete and marine ply in your wetroom before tiling. The tanking kit is waterproof, not water resistant. The tapes are elastic and accommodate any movements of the wall/floor and corner joints. The Puragum is easy to tile upon as it gives a mechanical key. Always ensure that all areas coming into contact with water are fully tanked and sealed. We recommend tanking the whole wetroom. One tanking kit is included in the wetroom kits sold by Plumbworld. Additional tanking kits can be purchased to cover larger areas.

Cleaning & Maintenance

Cleaning and maintaining the NOOD water trap inside the Purusline Living Linear Wetroom Channel could not be simpler. This simple guide is provided with all installation instructions and can be easily followed by the end user.

1. Lift out the NOOD water trap as above.
2. If necessary, rinse the NOOD water trap using water. Hold the NOOD water trap with the spring loaded body fully open whilst rinsed clean. Use only water and, if required, a small brush to clean the NOOD. It is important that you do not use bleach, bleach-based, caustic cleaning products or hair dye products on or in the NOOD water trap. Remove the NOOD first.

If bleach, deblocker or any other cleaning product is to be used in the pipework, then the NOOD water trap must first be removed and bleach, deblocker or any other cleaning product poured directly into the pipework.

3. Replace the NOOD water trap with two thumbs at each short end.

For resealing the NOOD water trap, you will need to use a washing-up liquid around the top rubber gasket when pushing the NOOD back into position for ease of installation.

Make sure the gaskets are completely clean so the NOOD is watertight. Ensure when placed back that the gully is fully inserted so the gasket is watertight using two thumbs at each short end.

If you have a blockage in the waste pipe system, remove the NOOD before rectifying/cleaning.
