

#### Shower Head Kit

#### Installation Guide

- 1. Open both of the cover caps from top and bottom of brackets. Use screwdriver to loose the bolts.
- 2. Move the rail away from the fixing brackets and mark the drill hole position through the bracket onto the wall.
- 3. Drill holes to a depth of 45mm into the wall.
- 4. Fix one of the brackets in to place and put the rail into the hole of bracket. Then fix the second bracketin to place
- 5. Secure the slide rail assembly into place by inserting and tightening the screw at the top and bottom. Insert the cover caps into the bracket.
- 6. Connect the end of the shower hose to the outlet of shower valve and the other end of the hose to the handshower. Place the handshower in the holder.

### Plumbing Systems and Water Pressure

All products are suitable for all UK Water Authority supply pressures. If the product is installed at low pressure (tank fed) then the minimum height from the outlet of the shower head to the underside of the cold tank should be 1.8 metres to ensure adequate performance.

This product should be installed in accordance with the current Water Regulations. Any claims that may arise will be dealt with on the basis that isolating valves are fitted.

#### Water Pressure:

We recommend a minimum water pressure of 0.5 Bar and a maximum of 5 Bar to ensure efficient operation of your product.

### Cleaning/General Care

Chrome and Gold plated finishes should be cleaned with warm water and a soft cloth, rinsed and then immediately buffed with a dry soft cloth. Under no circumstances must any aggressive or abrasive cleaning agents be used. The use of any abrasive agents or materials will invalidate the guarantee.
