UK

LIVING is an elegant bathroom series with focus on flexibility and safety in the bathroom.

The series is characterized by quality and comfort. LIVING bathroom handles are designed in modular systems and can be customized to suit the needs and appearance of the bathroom. The component parts of the modular systems can be replaced with free-standing parts, for example other lengths. The module systems can also be built together. Together, the modular systems and the freestanding parts offer almost unlimited design possibilities.

OBSERVE

- Installation should be carried out by a qualified professional.
- Take into account current wet room recommendations and standards when installing.
- The bathroom handles are not recommended to be installed on wetroom wall paper.
- For horizontal combinations, maximum distance allowed between brackets are 600 mm.
- The 1100 mm long part of the FK814/FK816 may only be mounted vertically. It is not approved for horizontal level placement.

TEST

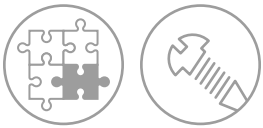

Maximum load 150 kg

Tested according to SS-ISO 17966:2016, 23.7.3

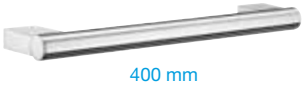

Tests performed by RISE.*

**Research Institutes of Sweden*

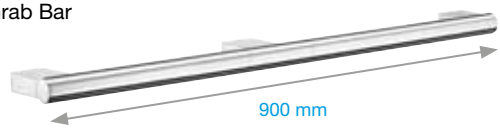

UK All modular systems.
