

# Solaro 15mm Thermostatic Lockshield & Drain Valve - Chrome

Modern straight radiator valve set with thermostatic control and integrated drain valve

Complete your radiator installation with this practical Solaro valve set. Combining thermostatic temperature control, a lockshield valve and an integrated drain valve, it provides the components needed for everyday temperature adjustment, radiator balancing and easier system maintenance, all finished in chrome with a white cover cap.

## Key features

- **Thermostatic temperature control** - allows the radiator output to be adjusted to help maintain a comfortable room temperature.
- **Lockshield valve included** - used to balance the radiator within the heating system so radiators can heat more evenly.
- **Integrated drain valve** - designed to make draining down the radiator easier when maintenance or repairs are required.
- **15mm connection size** - suitable for compatible 15mm radiator pipework.
- **Straight connection** - designed for installations where the pipework and radiator connection are aligned.
- **Bi-directional design** - provides greater flexibility when installing the valve.
- **Chrome-plated brass body** - combines durable construction with a smart chrome and white finish.
- **10-year guarantee** - for added reassurance.

## Technical specifications

| Specification        | Details                         |
|----------------------|---------------------------------|
| Brand                | Solaro                          |
| Product type         | Thermostatic radiator valve set |
| Connection type      | Straight                        |
| Control type         | Thermostatic                    |
| Connection size      | 15 mm                           |
| Lockshield included  | Yes                             |
| Drain valve included | Yes                             |
| Bi-directional       | Yes                             |
| Body material        | Chrome-plated brass             |
| Colour / finish      | Chrome with white cover cap     |
| Style                | Modern                          |
| Product code         | DSRADVAL12                      |
| Warranty             | 10 years                        |

## What's included

- 1 x Solaro 15mm lockshield valve
- 1 x Solaro drain valve

## Good to know

The thermostatic valve controls the flow of hot water through the radiator in response to room temperature, while the lockshield is used to balance the heating system. The integrated drain valve provides a convenient drain-off point when radiator maintenance is required.

Product information is based on specifications published on [Plumbworld.co.uk](https://www.plumbworld.co.uk). Always check heating system compatibility and installation requirements before fitting.
