

Elevate your space with a statement piece that blends modern design with intuitive functionality. The Orbitra tunable LED mirror features a striking, irregular silhouette framed by a sleek black trim, which creates a bold, unique look that instantly enhances any bathroom or vanity area.

Designed for both ambiance and precision, the integrated LED lighting transitions seamlessly from warm white, natural white, and to cool white with a simple swipe of the front-facing sensor. The touch-free control keeps the mirror surface clean and free from fingerprints, ensuring it always looks as refined as your space.

The dimmable feature allows you to fine-tune brightness to your preference, while the soft backlit glow adds depth and sophistication to your wall.
