

Corner Dual Fuel TRV & Lockshield

Product code: 129037

Technical specifications

Brand	Towelrads
Product code	129037
Product type	Dual fuel thermostatic radiator valve & lockshield set
Valve configuration	Corner
Control type	Thermostatic
Lockshield included	Yes
Construction	Brass
Finish	Chrome
Application	Dual fuel towel rail / radiator installations
Separate T-piece required	No
Heating element included	No
Pipe orientation	Designed for pipework entering from the wall

Product configuration

Dual fuel control

Designed for a dual fuel towel rail installation, the thermostatic valve allows control when the rail is operating from the central heating system, while the integrated dual-fuel arrangement accommodates an electric heating element. This allows the two heat sources to be used independently, subject to the towel rail and element installation.

Simplified installation

The corner valve arrangement is designed to remove the need for a separate T-piece, helping keep the installation neat and reducing the number of additional fittings required. It is intended for installations where the pipework comes from the wall.

What's included

1 x Towelrads Corner Dual Fuel Thermostatic Radiator Valve and Lockshield set, product code 129037. Please note that the electric heating element is **not included**.
