

White 15mm Straight TRV

Product Code: 125008

A straight thermostatic radiator valve designed to regulate radiator heat output according to room temperature. Its brass construction, liquid sensor and frost-protection setting provide practical temperature control for compatible radiators and heated towel rails.

Product Specifications

Specification	Details
Brand	Towelrads
Product type	Thermostatic radiator valve (TRV)
Model / MPN	125008
EAN	7426787992308
Orientation	Straight
Control type	Thermostatic
Material	Brass
Colour	White
RAL colour code	9010
Inlet connection	15 mm compression
Outlet connection	1/2" BSP
Sensor type	Liquid sensor
Temperature range	7-32 deg C
Frost protection	Yes
Bi-directional valve body	Yes
Positive shut-off	Yes
Maximum working pressure	10 bar
Lockshield included	No - product 125008 is the TRV only
Manufacturer guarantee	2 years

Key Features

- Thermostatic room-temperature control
- Straight valve orientation
- Robust brass valve construction
- Liquid-filled temperature sensor
- Frost-protection setting
- Bi-directional valve body
- Positive shut-off
- Suitable for standard 15mm radiator pipework

Installation Notes

Straight radiator valves are typically used where the radiator connection and central-heating pipework align in a straight line, commonly with pipework rising from the floor. Check radiator connection positions and system compatibility before installation.

Reference: Specifications checked against Towelrads manufacturer information and UK retailer technical data for model 125008. The manufacturer lists 125008 with lockshield 125004 when supplied as the complete straight TRV and lockshield set.
