

White and Chrome 15mm Angled TRV

Product Code: 125007

A modern angled thermostatic radiator valve designed to control the heat output of an individual radiator. The valve is manufactured from robust brass and uses a thermostatic control, making it suitable for radiator and heated towel rail installations where angled connections are required.

Product Specifications

Specification	Details
Brand	Towelrads
Product type	Thermostatic radiator valve (TRV)
Product code / MPN	125007
EAN	7426771457707
Connection style	Angled
Connection size	15 mm
Inlet connection	15 mm compression
Outlet connection	1/2" BSP
Control type	Thermostatic
Material	Brass
Finish	White and chrome
RAL colour code	9010
Sensor	Liquid sensor
Frost protection	Yes
Valve body	Bi-directional
Positive shut-off	Yes
Maximum working pressure	10 bar
Lockshield included	No - product 125007 is the TRV only
Manufacturer guarantee	2 years

Key Features

- Thermostatic control for individual room temperature adjustment
- Angled configuration for suitable radiator and pipework layouts
- Robust brass construction
- 15mm compression connection
- Liquid sensor
- Frost-protection setting
- Bi-directional valve body
- Positive shut-off

Installation Notes

Angled radiator valves are generally suitable where the radiator has side inlets and the heating pipework rises from the floor. Check the radiator connection position, pipework arrangement and system compatibility before installation. Towelrads lists the matching white lockshield as product code 125003.

Reference: Specifications checked against Towelrads manufacturer information and UK retailer technical data for model 125007. Towelrads identifies the complete angled TRV and lockshield set as 125007/125003.
