

## Plumbing Systems and Water Pressure

All products are suitable for all UK Water Authority supply pressures. If product is installed at low pressure (tank fed) then the minimum height from the outlet to the underside of the cold tank should be 1.8 metres to ensure adequate performance.

This product should be installed in accordance with the current Water Regulations. Any claims that may arise will be dealt with on the basis that isolating valves are fitted.

### Water Pressure:

We recommend a minimum water pressure of 0.5 Bar and a maximum of 5 Bar to ensure efficient operation of your product.

### Cleaning/General Care

Chrome and Gold plated finishes should be cleaned with warm water and a soft cloth, rinsed and then immediately buffed with a dry soft cloth. Under no circumstances must any aggressive or abrasive cleaning agents be used. The use of any abrasive agents or materials will invalidate the guarantee.

## Installation Guide

Prior to installation, please check that your plumbing system is adequate and that all pipes have been sufficiently flushed through.

1. Turn off the mains cold water supply. The mains stopcock is usually found where the supply enters the building.
2. It is also recommend that any hot water heating systems are turned off.
3. Drain the hot and cold water systems. To ensure complete drainage, open all taps.
4. Turn supply water line off and flush to remove debris.
5. Insert the threaded part of the shower outlet through the access point in the wall, connect to the water inlet and ensure it is anchored to a suitable solid structure.
6. Connect the end of shower hose to the outlet thread of outlet and the other end of hose to the hand shower. Put the handshower in the holder.
